

# THRONE OIL DOT-3

## Description:

It is high quality synthetic brake fluid with high boiling point which meets the DOT 3 standard, formulated with special additives for use in hydraulic brake systems.

## Usage Areas:

It is used in hydraulic braking systems and clutches of motor vehicles.

## Benefits and Advantages Provided:

- The recycled boiling point on the balance is very high.
- Braking systems do not cause problems in the brakes resulting from friction boiling and heat transfer to the brake hydraulics.
- By means of the high oxidation resistance, it provides long service life.

**Performance:** It compensates the performance specifications SAE J 1703, ISO 4925 ve FMVSS 116 DOT 3.

## Typical Properties:

Physical Property	Method	DOT-3
pH	ASTM D 1287	8,7
Density, g/cm <sup>3</sup> , 20°C	ASTM D 4052	1,065
Kin. Viscosity, cSt, 40°C	ASTM D 445	1100
Kin. Viscosity, cSt, 100°C	ASTM D 445	1,8
Boiling Point, °C	ASTM D 1120	260
Flash Point, °C	ASTM D 92	136

*\* The values given in the table are typical and they may vary from production to production.*
